Dynamic Streaming Protocol

The "**Dynamic Streaming Protocol**" represents a revolutionary advancement in the world of video streaming. Designed to adapt seamlessly to varying network conditions and server capacities, this protocol sets a new standard for efficiency, scalability, and user experience. Unlike conventional streaming methods, the "Dynamic Streaming Protocol" intelligently combines unicast TCP streaming with peer-to-peer (P2P) unicast UDP streaming over Web 3.0 blockchain technology, dynamically switching between them based on real-time demands. At the outset, the protocol leverages unicast TCP streaming to deliver content to viewers efficiently. As the number of connections approaches the maximum capacity of a single server, the protocol dynamically transitions to P2P unicast UDP streaming.

By employing P2P technology, the "Dynamic Streaming Protocol" optimizes the distribution of streaming content among connected players, alleviating server load and reducing the burden on network resources. This adaptive approach not only ensures consistent, high-quality video delivery but also significantly minimizes buffering and latency issues.

With the "Dynamic Streaming Protocol," video streaming providers can deliver a smooth and reliable viewing experience to a growing audience without compromising on performance. Whether it's for live events, on-demand content, or interactive applications, this protocol paves the way for a more robust, cost-effective, and future-proof video streaming solution. Embrace the future of video streaming with the "Dynamic Streaming Protocol" and unlock the potential of dynamic, efficient, and uninterrupted content delivery like never before..

Specification:

Web server:

- **Protocol:** HTTP and HTTPS.

Blockchain server:

- **Protocol:** UDP
- **Video format:** H264 and H265.
- **Audio format:** AAC, MP3.

IPTV panel:

- **User management:** create, modify and delete users.
- **Channel management:** create, modify and delete channels.
- **Movies management:** create, modify and delete movies.
- **Series management:** create, modify and delete series.
- **Reseller panel:** create, modify and delete his users.

P2P & Multicast player:

- **Android App.**

Requirement:

Minimum Server Requirement:

- **Linux:** Ubuntu 20.04(Recommended), Debian, Centos
- **Windows:** 64-bits
- **CPU:** 4v Core
- **RAM:** 8GB
- **Storage:** 160 GB
- **Bandwidth:** 1Gbps unmetered

Minimum Android Requirement:

- **CPU:** Dual-Core(1.2xGHz)
- **RAM:** 1GB
- **Storage:** 1 GB
- **Bandwidth:** 1Gbps
- **Device:** STB (recommended), Mobile Phone, Android Smarter TV

1.1 Blockchain Server (Web 3.0)

It includes Channel Unicast Server , Movie Unicast Server, Episode Unicast Server, XMLTV EPG Parser, MPEG TS EPG Parser, MPTS to SPTS Parser, Authorization Security Server and Authentication Server. It uses **Blockchain technology** instead of loader balance, CDN technology.

Additionally, You can create a new private cloud or join other private cloud networks for enhanced DDoS defense and content exchange capabilities as below network configuration.

The blockchain network consists of 4 pivotal nodes, each playing a crucial role in ensuring a robust and secure ecosystem for content delivery. These nodes are **User Server, Content Server, Proxy Server** and **Reverse Proxy Server**.

A Proxy Node acts *VPN server* to hide the User and Content Servers, or **A Reverse Proxy Node** hides the User Server, guarding it from direct exposure. This enhances security, load balancing, and overall performance.

1.2 Installation and License activation

Get checkout web page after you buy Ezserver License and contact us for installation password.

```
THANKS YOUR EZSERVER SUBSCRIPTION, PLEASE REFER THE BELOW:

Hello,

A. Linux Ubuntu 20.04 — video:

1. Login ssh by root or sudo user
2. apt install openssl
3. openssl version
4. if not version 1.1, reinstall openssl by the instructions.
5. cd /home && wget -O install.sh http://www.ezhometech.com [redacted] install.sh && chmod 777 install.sh
6. ifconfig //select one network interface for next step
7. ./install.sh
8. Contact sales@ezhometech.com for password.
9. Panel port and Streaming Port must be different.
10. cat /home/ezserver_enterprise/serial_number.txt
11. email /home/ezserver_enterprise/serial_number.txt (size: 97 bytes) with paypal transaction info. to sales@ezhometech.com for license activation.

B. Windows

1. Click here to download it and contact sales@ezhometech.com for unzip password.
2. Refer Readme.txt in zip file.
3. Double Click Ezserver.exe to create serial_number.txt.
4. email ezserver_enterprise/serial_number.txt (size: 97 bytes) with paypal transaction info. to sales@ezhometech.com for license activation.
```

Windows version:

- Download ezserver_enterprise.zip from the checkout web page.
- Refer Readme.txt in zip file to run Ezserver.exe.
- Email us the ezserver_enterprise/serial_number.txt (size: 74bytes) to active ezserver license.

Note:

Windows version with multiple network cards

- Open ezserver_config.txt and edit network_interface value..
- network_interface value
 - eth0: the first card
 - eth1: the 2nd card
 - eth2: the 3rd card.
- Delete serial_number.txt and double click Ezserver.exe to create new serial_number.txt to us for license reactivation.

Linux:

- Download install.sh from the checkout web page.
- ./install.sh with installation password
- Email us the ezserver_blockchain/serial_number.txt (size: 74bytes) to active Ezserver license.

1.3 Start / Restart / Shutdown

Windows version:

- Start:
 - ✧ Double Click Ezserver.exe
- Restart: Login Panel and Click the below button

wait 30~60 seconds to relogin panel.

- Shutdown:

Linux Version: ezserver at /home/ezserver_blockchain folder

- Start:
 - ✧ `cd /home/ezserver_blockchain`
 - ✧ `./start.sh`
- Restart:
 - ✧ `cd /home/ezserver_blockchain`
 - ✧ `./restart.sh`
 - ✧ or Login Panel and Click the below button

wait 30~60 seconds to relogin panel.

- Shutdown:
 - ✧ `cd /home/ezserver_blockchain`
 - ✧ `./shutdown.sh`

1.4 Admin Password

The screenshot shows a web application interface with a navigation bar at the top containing 'DashBoard', 'Users', and 'Channels'. A dropdown menu is open under 'Users', listing options: 'Add User', 'Add Android Device', 'Add MAG STB', 'Add Active Code', 'Manage Users', 'Manage Groups', 'Add Reseller', and 'Manage Resellers'. The 'Manage Users' option is highlighted with a black box and a red arrow labeled '1'. Below the menu is a table with columns 'User ID', 'User', and 'Password'. The table contains six rows of data. A red arrow labeled '2' points to the 'Password' column header. At the bottom of the page, there is a table with columns 'User ID', 'User', 'Password', 'Group', 'Channel List', and 'Owner'. A red arrow labeled '3' points to the 'Add User' button in the top right corner of this section.

User ID	User	Password
1	root	1234
2	Main	n1960
3		
4	Joel	1000
5	Jean-M	n-Michel-1975
6	850732	

User ID	User	Password	Group	Channel List	Owner
1	root	1234	golden	--	

2. IPTV Panel

Admin Panel Input URL: **http://domain:port**

Reseller Panel URL: **http://domain:port/reseller/index.htm**

- **User / Group / Reseller management:** create, modify and delete users, groups, Reseller.
- **Channel / EPG management:** create, modify, delete or import channels,, epg.
- **Movies management:** create, modify, delete or import movies.
- **Series management:** create series.
- **User Agent Protection:** Add, delete User Agent for Player protection
- **Blacklist management:** show and delete Locked IP.
- **Statistics:** show Channel and Movies watched information.
- **Setting**

2.1 User Management

There are 3 options for player activation.

- Click **"Add Android Device"** and Input Device Mac Address

The screenshot shows the 'Users' management interface. A dropdown menu is open over the 'Add User' button, with 'Add Android Device' highlighted. The background shows a table of users with columns for checkboxes, User ID, Username, Password, and Group. The table contains 8 rows of user data.

	User ID	Username	Password	Group
<input type="checkbox"/>	1	root		golden
<input type="checkbox"/>	2	test		golden
<input type="checkbox"/>	3	d8:f3:68:2		golden
<input type="checkbox"/>	4	44:d3:ad:		golden
<input type="checkbox"/>	5	c6:19:7a:		golden
<input type="checkbox"/>	6	30:95:87:		golden
<input type="checkbox"/>	7	30:95:87:		golden
<input type="checkbox"/>	8	00:1a:79:00:00:01		basic

- Inactive
- Delay 5 sec.

2.2.2 Import channels by m3u link

1. Click Channels: Manage Channels: Import M3U

<input type="checkbox"/>	Channel Name	Media Source
<input type="checkbox"/>	1 RTS 1	dir://media/videos/Movie/
<input type="checkbox"/>	2 TV3	http://bitcdn-kronehit.bitmovin.com/v2/f
<input type="checkbox"/>	3 RTS 2	dir://media/videos/Movie/

2. Click Import M3U

No Filter ▾ 20 ▾ Add Channel ↻ ▾

- Multi Refresh
- Import M3U
- Export as XML
- Transcoder

3. Input HTTP M3U Link and Click **Submit** button

Import Channels

Channel after Options

M3U from HTTP URL or Local File

HTTP URL

Local File : No file chosen

4. Then restart ezserver by `./restart.sh` cmd in ssh console or click panel power off button, then wait for 1~2 min. to login panel again.

5. if any issue after import by the above way., you can refer the below steps

- Use Chrome to download your m3u link and rename it to **new.m3u**
- Click **Choose Files** to select new.m3u and click **Submit** button.

Import Channels

Channel after Options

M3U from HTTP URL or Local File

HTTP URL

Local File : No file chosen

6. if any issue after import by the above way., you can refer the below steps

- Use Chrome to download your m3u link and rename it to **new.m3u**
- Upload **new.m3u** into server `/home/ezserver_enterprise` folder
- Open `/home/ezserver_enterprise/channel_definition.xml`
- Remove all lines **except the 1st line** and save it.
- Restart ezserver by `./restart.sh` in ssh console again
- Import it again by new URL: http://ezserverIP:panel_port/new.m3u
- Login panel to check it again.

2.3 Movie Management

Dashboard Users Channels Movies Series

Movie

Add Movie
Manage Movies

<input type="checkbox"/>	Movie Name ▲▼	Media Source

4 DSP Players

DSP Player is an **Blockchain P2P Player** that plays channels, movies and series from Ezserver for internet users.

Features:

- **TV, Movie and Series**
- **Support Youtube Channel Links**
- **EPG and Catch up TV**
- **Parent Control of adult content**
- **MAC ID Protection**
- **Channel Video Format: MPEG2/H264 Transport Stream**
- **Channel Audio Format: MP3/AAC, ADTS Stream**
- **Movie Format: MP4, MKV**

Main Menu

Account activation supports 3 options as below:

Account

The image shows a dark-themed dialog box titled "Activation Required". It contains four light gray buttons stacked vertically. The buttons are labeled: "Activate by code", "Login User/Password", "Activate by Mac Address", and "Cancel".

- **Activate by code:** Login by Active code with device mac address
- **Login User/Password:** Login by User name and password
- **Activate by Mac Address :** Login by device mac address.

Activate by code

The image shows a light-themed dialog box titled "Activation code". It features a text input field with an orange border containing the number "1234567890". Below the input field is a light gray button labeled "Activated".
